Experience

Senior QA Engineer | Maxbet - Novi Sad, Serbia | 05/2023 - Current

- Led quality assurance processes for software development lifecycle.
- Developed and executed automated test scripts using Cypress (JS) and Playwright(TS)
- Collaborated with cross-functional teams to identify and resolve software defects.
- Mentored junior QA engineers on testing methodologies and best practices.
- Designed test plans and cases based on functional specifications and requirements.
- Implemented continuous integration practices to enhance testing efficiency.
- Analyzed test results and reported findings to stakeholders for improved decision-making.
- Participated in Agile Scrum meetings to plan sprints and review progress towards completion goals.
- Identified and logged defects in the bug tracking system and verified bug fixes.
- Analyzed business requirements, technical specifications, user documentation, and other project documents to create detailed test scenarios.
- Utilized tools such as JIRA for defect tracking, Github for CI and CD pipelines and source code management.

QA Engineer | Levi 9 - Novi Sad, Serbia | 12/2021 - 05/2023

- Company Overview: The Southeastern Pennsylvania Transportation Authority (SEPTA) is a regional public transportation authority that operates bus, rapid transit, commuter rail, light rail, and electric trolleybus services for nearly four million people in five counties in and around Philadelphia, Pennsylvania. It also manages projects that maintain, replace and expand its infrastructure, facilities and vehicles.
- Testing hardware in the form of validators (on boarding, gates for disabled, turnstile gates, rotary gates) which have a wide range of uses, i.e. railway stations, subways etc.
- The Southeastern Pennsylvania Transportation Authority (SEPTA) is a regional public transportation authority that operates bus, rapid transit, commuter rail, light rail, and electric trolleybus services for nearly four million people in five counties in and around Philadelphia, Pennsylvania. It also manages projects that maintain, replace and

expand its infrastructure, facilities and vehicles.

QA Engineer | Schneider Electric DMS NS - Novi Sad, Serbia | 03/2017 - 12/2021

- Test case design, creating test cases and executing them (reporting bugs, defects and failures). Working within functional and non functional testing, black box, integration, accessibility, acceptance testing.
- I have been a test lead for a project (SAPN - South Australia Power Network), and in charge of a complex enterprise test system for that project.
