PROFILE

Experienced Quality Assurance Test Engineer with a demonstrated history of working in the computer software industry.

Skilled in Software Quality, Bug Tracking, Test Cases, Test Automation, Bugzilla, Team Foundation Server, JIRA.

Strong quality assurance professional with a Bachelor of Science (B.Sc.) focused in Computer Software from Faculty of Technical Sciences. I am a former professional basketball player, married, three kids, love to

listen to music, swim, play ball, and play a MOBA game called Dota2.

I have shifted professional preferences which are related to web development, and web app testing. Recent winner of the React challenge organized by the employer. The goal of the challenge was to develop a web shop using React framework, Material UI, Redux Toolkit, with test automation in Cypress.

I have also successfully completed multiple courses regarding Cypress and Selenium (Java), which are currently my main fields of interest.

EMPLOYMENT HISTORY

Mar 2023 — Present	QA Engineer, Levi 9	Novi Sad
	Testing of the back end system for the TVM's (Ticket vending machines), For the BVG and RNV projects. The Berliner Verkehrsbetriebe (German: 'Berlin Transport Company') is the main public transport company of Berlin, the capital city of Germany. It manages the city's U-Bahn underground railway, tram, bus, replacement services and ferry networks, but not the S-Bahn urban rail system. Rhein-Neckar-Verkehr GmbH (RNV, Rhine-Neckar Transport Ltd) is a company operating public transport (specifically bus and tram services) in the Rhine-Neckar region of Germany, including the cities of Heidelberg, Mannheim and Ludwigshafen am Rhein.	
Dec 2021 — Feb 2023	QA Engineer, Levi 9	Novi Sad
	Testing hardware in the form of validators (on boarding, gates for disabled, turnstile gates, rotary gates) which have a wide range of uses, i.e. railway stations, subways etc. The Southeastern Pennsylvania Transportation Authority (SEPTA) is a regional public transportation authority that operates bus, rapid transit, commuter rail, light rail, and electric trolleybus services for nearly four million people in five counties in and around Philadelphia, Pennsylvania. It also manages projects that maintain, replace and expand its infrastructure, facilities and vehicles.	
Mar 2017 — Dec 2021	QA Engineer, Schneider Electric DMS NS	Novi Sad
	Test case design, creating test cases and executing them (reporting bugs, defects and failures). Working within functional and non functional testing, black box, integration, accessibility, acceptance testing. I have been a test lead for a project (SAPN - South Australia Power Network), and in charge of a complex enterprise test system for that project.	
Feb 2014 — Oct 2017	Senior Power plant operator, Continental Contitech Fluid, Serbia	Subotica
	Senior Power plant operator on various pipe production machines, and a 3 month engineering internship which included training in the field of 5S, general rules and production processes, advanced training in the field of machines for automatic bending (Rosenberger), introduction, production, manipulation and inspection of documents in the IE department, practical work, with senior engineers.	
Mar 2011 — Feb 2014	TV Program Editor, HD Music Channel	Novi Sad
	Program editing, video production (Adobe Photoshop, Premiere), computer maintenance.
